

CONTROL DELIVERS NETWORKING RELIABILITY AT SUPER BOWL LIVE

Last month, in preparation for Super Bowl LIVE, Control Corporation's Rocketlinx PoE Switches were selected by the City of Houston to manage the networking side of their cutting-edge surveillance system.

The system, installed by Houston-based security integrator Pref-Tech, deployed dozens of AXIS cameras and speakers, Louroe Electronics sound detection equipment, and Siklu radios to monitor entryways, stages, and entertainment areas throughout the more than 750,000 square foot plaza.

A combination of Control's Rocketlinx PoE Switches, SFP's, and industrial power supplies were deployed at Discovery Green to manage all of these devices in the urban park. "Given the size of this event, it was extremely important that we deployed a reliable security network that could provide continuous coverage over a large outdoor area," said Jack Hanagriff, from the City of Houston's Office of Public Safety and Homeland Security.

Among the Control products deployed was our Rocketlinx ES7510-XT, a managed, PoE Plus Fiber switch designed to meet the high power and advanced management needs of critical security applications.

"With an ever-growing need for advanced security measures at these large events, it was great to know that Super Bowl LIVE and the City of Houston trusted Control as the networking piece to their solution."
– Tom Baker, Security Products Division, Control Corporation.

Control's wide range of RocketLinx Power over Ethernet switches are engineered for a wide range of applications including security, transportation, and industrial automation solutions. With rugged, drip-proof housings, redundant power inputs and performance command-line interfaces, these Power over Ethernet switches provide reliable networking solutions to any application where the power source is not conveniently located.

RocketLinx® ES7510-XT

Part Number: 32046-3

KEY FEATURES AND BENEFITS

- Integrate IP cameras, access points and other PoE devices
- Eight 10/100BASE-TX PoE Plus ports and two Gigabit RJ45/SFP combo ports featuring Digital Diagnostic Monitoring (DDM)
- PoE ports support both IEEE 802.3af (15.4W) and the latest high power IEEE 802.3at standards (30W)
- Eco-Friendly Power Budget Efficiency Mode
- Easy setup and administration via Netvision application, web page or Cisco-like command line interfaces
- Advanced redundant ring support with 5ms recovery time, for up to 4 x 100M rings plus two Gigabit uplink rings
- Advanced security features include Port Security, Access IP List, HTTPS and SSH login
- SNMP and IEEE 802.1AB LLDP for network management
- Tag-VLAN supporting multiple VLAN traffic isolation
- LACP port trunking for bandwidth aggregation to support video surveillance
- Redundant DC power inputs and multiple event relay output for advanced device alarm control
- Extended operating temperature -40° to 75°C
- NEMA TS2 certified
- RoHS2 compliant under CE
- IPv6 support

PRODUCT DESCRIPTION

PoE Plus Supporting High Power Devices

The Control RocketLinx ES7510-XT managed industrial PoE Plus switch is designed to meet the high power and advanced management needs of critical traffic applications such as real-time IP video surveillance and wireless communication utilizing outdoor rated IP cameras and high power IEEE 802.11 access points. Featuring a rugged design for harsh environments, intuitive web, CLI, SNMP management options, power scheduling and eight fully compliant IEEE 802.3at PoE injector ports, the ES7510-XT is easily installed in industrial settings and traffic cabinets supporting even the most power intensive devices such as IP cameras with heaters and pan/tilt/zoom controls.

Innovative Power Control

In addition to functioning as a PoE power source, the ES7510-XT includes advanced device controls, ensuring that power consumption does not exceed parameters defined by the user. This includes power budget control functions to limit power output on

devices not reporting correct consumption rates and device priority options to guarantee power to critical devices while avoiding power supply overloads.

Management and Security

The RocketLinx ES7510-XT is equipped with full Layer 2+ management capabilities to provide the most flexible network configuration and control. Features like Link Aggregation Control Protocol allow grouping of multiple ports to enhance bandwidth and provide load balancing while Port-Based VLAN, QoS, IGMP Snooping, and Rate Control features enable optimum control over the network environment. In addition to the full array of management capabilities, the ES7510-XT also supports the most advanced security features to protect the network and guarantee secure, reliable data transmission. Fault relay and e-mail notification of event alarms, DHCP supporting IP and MAC binding, IEEE 802.1X network access control, SSH, and many other controls are included to make secure administration and management a simple task.

Warranty Information

Control offers a 30-day satisfaction guarantee and 5-year limited warranty.
